

UPGRADE YOUR RTV

Do more. Achieve more.
With matev attachment solutions for **KUBOTA RTV**.

matev

From UTV to multi-tool

More than just driving. More than just transport.

Ready for more

Your Kubota RTV is ideally equipped to handle more than just transport tasks. With the right attachments from matev, you can expand its range of applications in a targeted way.

Sweeping with the **SWE-18-45 sweeper**. Clearing snow with the **SRM-FB 190 snow blade**. Two matev attachments in sizes specifically tailored to the track widths of UTVs.

This turns your RTV into a versatile workhorse for grounds care and winter services – and demonstrates just how much potential a compact vehicle can offer.

And what can your UTV do tomorrow?

Sweep today. Clear snow in winter. And discover new possibilities for your UTV. Because here at matev, we don't design vehicles for just one task. We think in terms of solutions – and the potential that still lies within them.

Less downtime. More use. More possibilities.
