Intelligent irrigation for municipal professionals

Dry summers, sensitive green spaces and increasing demands in municipal maintenance require well thought-out solutions. With our new irrigation technology product category, we offer you the right answer: powerful, flexible and perfectly customised for municipal use. Whether green spaces, traffic islands or cemeteries - with our systems, you can bring water exactly where it is needed.

The watering arm for precise and convenient watering

The hydraulically controllable **WTS-WA 420 H watering arm** expands your options for efficient irrigation in municipal areas. Developed for maximum reach, flexibility and pinpoint accuracy, the watering arm is the ideal solution for hard-to-reach areas,

traffic islands or planted central reservations. Thanks to intelligent control, a large reach and versatile spray options, every watering process can be optimally adapted to the local conditions.

Clever technology for a high level of comfort

The WTS-WA 420 H watering arm impresses with its long reach of over seven metres and convenient, fully hydraulic control. All movements - swivelling, lifting, lowering and positioning - can be controlled precisely from the tractor. This allows you to reach even hard-to-access green areas quickly and efficiently. Depending on the application, you can choose between a gentle **brass spray nozzle** or a powerful **PowerJet nozzle**. For maximum control and safety, the watering arm can be optionally equipped with a flow meter. A mobile parking stand ensures safe assembly and disassembly and space-saving storage when not in use. Ideal for professional use where flexibility and reliability are essential.

Technical data

	WTS-WA 420 H
Arm length	423 cm
Swivelling range	183°
Max. height when folded for panel mounting	261 cm
Operating range	over 700 cm possible
Delivery rate of the water pump	180 L/min

The mobile irrigation system for every location

The **WTS-TS 2000** is the compact **irrigation system** for professional municipal use - perfectly matched to the matev TRL-3D 20 trailer. With two IBC tanks, flexible filling and emptying options and its narrow design, it is ideal for use on narrow paths and in

inner-city green spaces. Quickly ready for use, efficient in operation and versatile in combination, your tractor becomes a mobile watering unit.

Maximum flexibility for filling and emptying

The WTS-TS 2000 is your versatile irrigation system for municipal use. Two robust **IBC tanks** provide the appropriate water capacity and **can be filled flexibly** depending on the situation - either conventionally through the upper tank openings or via a hydrant. For maximum independence, the system can also be equipped with a suction hose including a suction basket to draw water directly from ponds, cisterns or other open sources.

The system also offers complete freedom when it comes to water delivery: you can choose between a hydraulically controllable **watering arm**, a **hose reel** or a classic **water hose connection** - or combine the variants flexibly. The WTS-TS 2000 adapts seamlessly to your requirements on site and enables efficient, water-saving and targeted irrigation.

LAWN CARE

Mowers | Collecting systems

Lawn harrow | Irrigation technology

GROUNDS CARE

Sweepers | Suction sweepers

Weed brushes | Trailers

WINTER SERVICE

Snow blades | Spreaders

Snow blowers

BASIC EQUIPMENT

Front linkages | PTOs
