

#grounds care

PRODUCT PROGRAM

ATTACHMENTS

mateu

Cosmetics for the road

This is how **professional grounds care** works - With matev attachments, you can remove dirt, leaves and weeds quickly and thoroughly. Robust sweepers ensure clean streets and squares, while multifunctional suction nozzles and weed brushes enable environmentally friendly and effective cleaning. The matev TRL-3D 20 trailer ensures smooth removal. With a high payload and practical three-sided tipping function, you can transport leaves, dirt and green cuttings effortlessly - for efficient and professional surface maintenance.

Swept clean with every use

The **SWE-45 front sweeper** with 450 mm sweeping roller diameter is ideal for sweeping dirt and snow on small and municipal tractors from 13 to 36 kW. The central drive enables sweeping close to kerbs and house walls, prevents swerving out of the track and allows quick roller changes. Height-adjustable support wheels and optional pendulum levelling ensure the best results - even on uneven terrain.

More than just sweeping

The matev **MRM-120** and **MRM-120 AS suction sweepers** ensure efficient and thorough cleaning of large areas. While the MRM-120 with its hydraulically driven rotor brush reliably loosens even stuck debris, the MRM-120 AS offers even more effective material collection and disposal thanks to its active suction and chopper fan. Both models are versatile and particularly economical in combination with matev pick-up devices or trailers.

Where it sweeps, cleanliness remains

The **SWE-57 sweeper** with a 570 mm sweeping roller diameter and working widths between 145 - 185 cm is designed for professional use for sweeping dirt and snow on municipal tractors and carrier vehicles and has either a mechanical side drive with chain drive or a hydraulic drive. Thanks to extensive accessory options such as dirt hopper, side brushes and water sprinklers, the machine can be optimally customised for different areas of application.

Also available: Our compact **SWE-35 sweeper** for mowing tractors or tractors up to 25 hp. Find out more at www.matev.eu

Weed removal without effort

The matev **weed brush WRM-145/200** is your environmentally friendly solution for chemical-free weed removal. With a mechanical belt or hydraulic drive, it efficiently removes weeds and stubborn dirt from pavements, roads and squares. Thanks to its robust design, it is perfect for professional use in cities, parks and public areas. Rely on sustainable technology for clean surfaces - all year round!

TRL-3D 20

The flexible all-rounder

The matev **TRL-3D 20 trailer** is a robust single-axle three-way tipper with a payload of 2 tonnes and a 45° tipping angle - ideal for municipal use as well as gardening and landscaping. Its versatile customisation options make it a real all-rounder:

- **Grid attachment** for more loading volume - perfect for leaves, clippings and light bulk material.
- Combination with the MRM-120 AS suction sweeper system for efficient **leaf collection**.
- **Add-on drop sides** for the safe transport of bulky materials.
- **Irrigation system** with IBC tanks and clever hose system - ideal for green care.

With its sturdy design and multifunctional equipment, the TRL-3D 20 is the perfect solution for demanding transport tasks.
