ANBAUGERÄTE

matev

When winter gives it all, we give even more

To ensure you're not left out in the cold during winter, matev offers the perfect equipment for your toughest challenges. With our flexibly configurable control units, durable snow blades up to 2.20 m working width, and robust spreaders, snow and ice are cleared quickly and efficiently—even in extreme weather. Streets, paths, and large areas remain safe and reliably usable even in deep winter.

Ready for any snow battle

The **SRM-FB flip blade** with a height of 55 cm is suitable for lawn and compact tractors up to 36 kW. Its stable construction, the standard pendulum levelling system and the integrated safety mechanism ensure smooth winter maintenance. Automatic folding down in the event of obstacles enables uninterrupted and clean work.

Tough enough for the worst of winter

Our **SRM-SF spring flap blade** with a blade height of 61 or 75 cm is ideal for compact tractors from 17 to 42 kW. The robust segment design with steel plate, pendulum levelling and hydraulic angle adjustment ensures an even clearing result. Obstacles are safely overcome by folding back the spring segments for safe and efficient clearing in winter.

Clearing in style

The **SRM-VP snow plow** is available in 130 cm and 160 cm widths and developed for the most demanding requirements. Its adjustable V-shape allows straight positioning or targeted snow clearing. Spring segments protect vehicle and blade from collisions, ensuring safe and efficient work on snow and ice.

Also available:
Our lightweight **SRM-FB 140 LE snow blade** for mowing tractors or tractors up to 25 hp. Find out more at www.matev.eu

SPR-BX

Uncompromising precision

The **SPR-BX box spreader** from matev impresses professionals with exact metering. Whether for walkways or large areas, mechanical, electric, or hydraulic control ensures even spreading. Its robust construction and versatile accessories make it the perfect companion in snow and ice.

Smart spreading

The **SPR-DS disc spreader** combines robustness with longevity. A solid frame made of either steel or stainless steel and a durable PE hopper offer high reliability. With various drive types and rugged gearboxes, it is suitable for nearly all spreading materials. Spreading rate and width can be precisely adjusted for excellent distribution.

SBL-40

Icebreaker for pros

The **SBL-40 snow blower** is specially designed for tough winter use. Its solid construction and high-performance clearing system make it the ideal tool even in tight spaces, narrow access roads, or heavy snowfall. A reliable discharge system ensures maximum safety even on sensitive surfaces.
