UPGRADE YOUR GATOR

Do more. Achieve more.
With matev attachment solutions for **John Deere Gator**.

matev

From UTV to multi-tool

More than just driving. More than just transport.

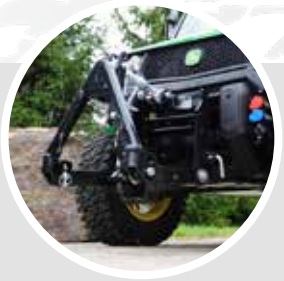

Ready for more

Your John Deere Gator is ideally equipped to handle more than just transport tasks. With the right attachments from matev, you can expand its range of applications in a targeted way.

Sweeping with the **SWE-18-45 sweeper.** Clearing snow with the **SRM-FB 190 snow blade.** Two matev attachments in sizes specifically tailored to the track widths of UTVs.

This turns your Gator into a versatile workhorse for grounds care and winter services – and demonstrates just how much potential a compact vehicle can offer.

Attach and go.

The tool-free removable **front linkage** makes your Gator even more versatile – available with Cat. 0 for quick implement changes or as a compact direct-mount version.

The **hydraulic system**, delivering up to 30 l/min at 180 bar, can be conveniently controlled via the touchpad.
